

# RocheDiabetes Care Platform

Enabling you to quickly connect to actionable insights for a more personalised approach to diabetes care.

## Fostering faster connections

The RocheDiabetes Care Platform streamlines workflows by quickly providing you with meaningful, actionable insights. This means you spend less time gathering data and can use your consultation time for what really matters – truly getting a better understanding of your patients.

### Actionable insights

Quick and easy visualisation of key diabetes data helps you discover patterns and draw attention to areas that need intervention.

### Efficient consultations

Simple reports facilitate communication to help support patient learning and engagement in their diabetes management.

### Individualised treatment solutions

Timely adjustments in therapy and patient lifestyle can be made.

# At a glance

## Easy

- › Online for less hassle with back-ups and software
- › Secure data that conforms to GDPR
- › Simple data transfer from 130+ diabetes management devices

## Engaging

- › Facilitates high quality communication
- › Helps with patient understanding about lifestyle and therapy changes
- › Helps clinicians and patients create specific care plan goals and identify new therapy options

## Efficient

- › Quickly gain insights on important aspects of data
- › Identify items that may require action
- › Supports quick, consistent clinical evaluations and decision making

## Enabling

- › Increases resource management
- › Helps streamline workflows

## Interactive dashboard

Patient information at a glance. Quickly view reports and graphs on BG levels and statistics that can be easily customised to meet your personal needs.

## Status cards

One look is all it takes: hypos, hypers and percentage of BG values in range. This simple colour visualisation can be a big help in showing patients how they are doing and motivating them to change their behaviour.

## Fostering faster connections
